Art Unit: 1612

Claims 15-27 are presented for examination.

The amendments and remarks filed on April 14, 2008 have been received and entered.

Claims 15-27 are rejected under 35 U.S.C. 112 first paragraph for the reasons set forth on page 2 of the office action of August 28, 2007.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are drawn to the phrase "inhibiting PMN infiltration". The instant specification fails to provide support for such phrase. Therefore, the phrase inhibiting PMN infiltration is considered to be new matter. Furthermore, the claims are drawn to the "wherein the lipoxin compound is an analog of natural lipoxin A4, and wherein the analog of natural lipoxin A4 has metabolic transformation region different from the natural lipoxin A4". The specification discloses examples of certain compounds, which are the analog of natural Lipoxin A4. However, the claims in their broadest reasonable interpretation read on a pharmaceutical composition comprising any analog of natural lipoxin A4. To provide adequate written description and evidence of possession of the claimed genus, the specification must

provide sufficient distinguishing identifying characteristics of the genus. The factors to be considered include disclosure of complete or partial structure, physical and /or chemical properties, functional characteristics, structure/function correlation, or any combination thereof. While the specification describes a few species of the instantly claimed active compounds, it does not describe a sufficient number of analogs as to convey possession of the entire genera encompassed by the instant claims.

The amendments filed on April 14, 2008 necessitate the new ground of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
